

ONE GIANT LEAP WITH OUR MODEL OF SOCIAL DEMOCRACY

We want to keep building a sustainable society by continuing our development efforts and helping Skellefteå municipality make one giant leap into the future.

We will continue to champion our model of social democracy. Its blend of solidarity, sustainability and social security has laid the foundations for the future to come.

MANIFESTO

Socialdemokraterna

OUR MODEL OF SOCIAL DEMOCRACY - SOLIDARITY, SUSTAINABILITY AND SOCIAL SECURITY

We build our municipality with solidarity

Socialdemokraterna is a party grounded in solidarity and equality. We take a stand for the building of a community that includes all our citizens, creating a strong, open and welcoming society. That means we all contribute how we can, given our abilities. We also believe in an international solidarity where we make a stand for human rights, expanding the number of democracies and showing support for societal movements with that agenda.

We also take a stand for the Swedish model, which means strong unions negotiating wages and working conditions in agreements with the employer. Public authorities should not be a part in this system.

We stand against the free market being given free room to operate in the social welfare system. Our taxes are meant to fund our common welfare, not create profits for private companies. We also oppose the over-compensation of the private school system. We emphasize school resources being distributed as needed.

We build our municipality with sustainability

We strive to build our city, local towns and villages in ways that are sustainable for the future. It is in our common interest that our entire municipality should thrive and grow. Each area is unique and should be enabled to create jobs, business enterprises, education and good living conditions.

Socialdemokraterna in Skellefteå have a strong tradition in environmental issues. For generations we have made big investments to protect the environment. Dedication and deliberate political efforts have made Skellefteå an example for the world. And with green technology, clean energy and sustainable solutions we bring the world to Skellefteå.

We build our municipality with social security

Our model of social democracy is a part of what makes Skellefteå fantastic. By making demands on each other and cooperating we evolve our model of community model of society. Social security should be a general model open for everyone. It should be funded by taxes and distributed as needed. It should be regulated by the government, transparent and democratically controlled. That is how we create a safe and secure municipality.

CAMPAIGN PROMISES

During this term of office
we will strive for:

Principal commitment: Our municipality should be safe and secure for all, in all ways. Our important societal functions should be publicly owned and operated and we will be the display window for a green transition.

- Improved road maintenance focusing on rural areas.
- Just working conditions in our entire municipality.
- A package of measures to improve the work environment for employees in care, support and welfare. Focusing on scheduling, freedom of action and health.
- Establishing a vibrant center for culture and non profit-organizations at Nordanå.
- Investments in gymnasia. A new center for cheerleading and gymnastics. At least one new full size gymnasium in a rural area and a new full size indoor soccer stadium.
- A continued comprehensive effort in new construction of housing. Focusing on rental apartments but also other forms of housing and green areas.
- An expansion of the municipal OB-preschool enabling families to manage life puzzles.
