

ELECTION PLATFORM

FOR LABOUR

Socialdemokraterna

A GROWING MUNICIPALITY CREATES JOBS

Skellefteå keeps growing and developing at a pace that few would have anticipated. Our model of social democracy has created a strong municipality where we own and operate our harbour, airport and power company while having kept extensive land ownership. That has laid the foundation for our current growth rate, unparalleled in modern times.

Bergsbyns industrial site

After the establishment of the battery factory the industrial site around it continues to grow. We will make sure that that process keeps moving forward and make sure that all other establishments can contribute to the site remaining a catalyst for the development of our municipality. Skellefteå is an important part of the transformation to green energy happening in the north of Sweden. As politicians we strive to be an enabler in that and for Skellefteå to be an example for the country.

An endeavor for the future

The municipality's own enterprises as well as local companies need more labour. With continued investments in Campus Skellefteå we secure the availability of competence. There we train people for employment in, for example, green industry, healthcare and gaming software development. We must be able to welcome new citizens in the best way possible. Everything from housing to childcare, education to health and social care must be up and running from day one. The municipality also has to be a good employer with focus on providing a good work environment.

Growth can be painful

With the pace of Skellefteå's growth it is crucial that all municipal activities manage to keep up. Fair conditions on the labour market are also important. With a growing population the need for a more extensive and working infrastructure with schools and housing also intensifies. Since the Social Democrats haven't taken a step back but have rather been taking leaps forward, this means not only dealing with current needs but also planning ahead for future requirements.

CAMPAIGN PROMISES

**During this term of office
we will strive for:**

Principal promise: Our model of social democracy in which we own and operate crucial societal functions will be maintained. We will not sell out our municipality, we will keep developing it.

- Employment for people with disabilities should increase with help of programs such as learning employment. Municipality management and municipal companies should hire more people with disabilities.
- Investments to ensure adult education is able to meet the coming needs of the local job market.
- Increased tax revenue for the municipality that will be aimed at investments in welfare for our citizens.
- At least conditions comparable to collective agreements in all our municipal procurements.
- Just working conditions in all workplaces in our municipality.

SKELLEFTEÅ

one giant leap

“We have to remember that our progress and development is taking place in our entire municipality. Hence we need a platform for our entire municipality. Our gaming industry isn't only active at Campus, it is also in Jörn.

There are jobs, housing and opportunities in all parts of Skellefteå kommun”

Tommy Lundmark – Bovikens S-förening
