

ELECTION PLATFORM

FOR EDUCATION

Socialdemokraterna

AN EQUAL PUBLIC SCHOOL IS A SPRINGBOARD

Our school system should be a springboard towards the future for all our children and students. With knowledge and education being the focus the school staff have to be given the best possible working environment.

We will provide good learning environments for all students which is why we have invested greatly in our schools the last few years.

Resources for education

We will keep investing in the school system. That is how it should be. In the school system we lay the foundation for the future, by securing education for our children. In doing that we give them the best possible prerequisites for their future in Skellefteå. The school system should strive for equal opportunities for all students by providing the right challenges for growth and learning based on their needs. Our school system is one of the most important tools as we strive for an equal society. We also oppose the over-compensation of the private school system. We emphasize school resources being distributed as needed.

Schools and preschools in our entire municipality

The school system and preschool is for everyone. Given the population growth facing us the need for starting up more preschools will remain. Large units as well as smaller. We are proud of our schools and preschools and strive for a principle of subsidiarity and high quality in our entire municipality.

Education for ones entire life

Socialdemokraterna believes in lifelong learning. Hence we want to ensure education is available no matter your stage in life. We also want to promote reading as we see the positive effects it has on learning. Upper secondary school, university, adult education, study associations, folk high schools and libraries are all important for further education and retraining. It is never too late to make use of the springboard, towards new ventures or employment.

CAMPAIGN PROMISES

During this term of office
we will strive for:

Principal promise: We will prioritize resources in our whole municipality to create and run schools for all children.

- A wider selection of post-secondary school courses and programs.
- Invest in our municipal OB-preschool to enable possibilities for families to solve their life puzzle.
- An effort towards staffed school libraries. Aimed at strengthening learning and an interest in reading.
- An effort aimed at schoolyards with the purpose of increasing physical activity for students.

SKELLEFTEÅ

one giant leap

“I am so happy that our election platform emphasizes an equal school system and that learning is a process for your entire life.

Growth and development is rapid, especially up here! That is why opportunities for further education and retraining so that you can find a new path in life is so important.

And we will need a whole lot of language training now that people are moving here from all over the world.”

Katarina Blomqvist – Skelleftehams S-förening
